EXPERTS IN VOIP & CONVERGED COMMUNICATIONS

fixed line services

Since deregulation, the choice for fixed line services has soared. There are numerous carriers who can provide you with competitive rates and services depending on your business requirements. Navigating the choice though can be confusing. This is where working with EVAD can save you time and money.

Historically using a different carrier involved expensive reprogramming or the use of routers. Now all this has been replaced with Carrier Pre

Selection (CPS) where the routing is done within BT's network rather than at the customer's premises.

With years of experience in the fixed line business we are able to match your requirements with the best the market has to offer. Whether you need non-geographic numbers or a more detailed audit of your fixed line requirements, we can help find the best solution for you.
